MECHANICAL MAN AS SAFETY
DEVICE FOR RAILROADS

The mechanical man answers the telephone, throws switches, talks, opens doors, and does hundreds of other things these days, but perhaps his most novel achievement is running a railroad train. Now "Old Man Reliable" is riding, perched right above the cowcatcher, on the front of engines of the New York, New

VETERINARY

WETASKIWIN VETERINARY

HOSPITAL

Dr. N. A. Johnson, V.S., Proprietor

Specialist in Veterinary Surgery

Lorne Street East Wetaskiwin

Haven & Hartford Railroad. His eye

might be good day and night.

He is on the job every minute.

Should the engineer fall, he is on the

job to warn him instantly and to act

within five seconds, in an emergency,

to stop the train. He is foolproof,

according to the engineers, and elimi-

ates the fault of mistakes too

common to man.

"Old Man Reliable" is the name

the railroad workers have given the

automaton. "A Ton of Safety" is

another of their names for the de-

vice, for a ton is the approximate

weight of the equipment necessary

to fit a locomotive for train control.

Train control is the way the railroad

officials speak of the apparatus,

which is similar to a radio set and is

housed in a box on the front end of

the engine.

The device relays light signals of

the right-of-way to the engine cab,

and the engineman is required to ac-

knowledge a change in signals within

five seconds. If he fails to comply

within that period the automatic de-

vice applies the brakes. They cannot

be released until the train has come

to a stop and the engineman has de-

clared to the ground and manipu-

lated what is known as a "penalty

reset device" underneath the cab. He

may then climb back into the cab

and release the brakes.

The use of this safety apparatus

has also necessitated adopting an-

other color in railroading. Green for

track is clear; red for stop, and yel-

low for proceed cautiously, have

been standard colors for years. Now

"lunar light" a white light, resem-

bling in color the light given by the

moon, has been adopted for the

safety device to warn the engin-

eer that unless he acts the brakes will

be applied within five seconds.

NEWSPAPER FINANCES

There are many people who expect

to pay their grocer or their butcher

every month, but they don't. Yet a

newspaper subscription bill can be

paid any old time. Some of them will

let it run for years, if the publisher

does not cut it off. And if it is cut

off they get huffy, and declare they

will never take the paper again. They

feel indignant because doubt has been

thrown on their credit. They should

reflect that the publisher gets no good

out of their credit. What he needs,

to pay his help and settle his paper

bills, etc., is cash, and nothing will

take the place of the same.

This irregularity of income is the

cause of many newspapers that

would be in a thriving condition if

they could depend on the same

payments that the dry goods man and

the shoe store can look to.

It takes a lot of time and effort to

collect all these little bills. It usually

costs more than the bill is worth, to

collect an overdue subscription ac-

count. If those accounts could be

promptly paid, the newspaper people

could use the more regular income in

creating new features for their paper,

adding to its usefulness and interest,

and making it constantly a greater

credit to the city of which it is an

exponent.

The individual citizen often says

that he would like to do something for

his home town, but he has no particu-

lar gift for any form of public work,

so does not know when and where to

begin. Here is one way in which he

can begin right now. Let him see if

his subscription is overdue. If it is,

let him walk up to the office and

settle, and take pride in doing so,

realizing that when he performs that

simple little act of justice and good

business, he is helping an agency that

works every day for his home town,

to avoid needless burdens and expense.—

Cranbrook Courier.

ROBBERS

There are many kind of robbers.

There is the bandit who holds you

up on a lonely road when you are

out morning; there is the desperado

who wheels a machine gun up to

the door of the bank and goes in

and collects; there is the brave and

dashing brigand who glances over

his shoulder to make sure there is

no one looking and then robs the

poor box at the door of the church;

then there is the man further down

in the social scale who steals pen-

nies from the crippled news boys,

but of all of them one is so low

as the robber who robs the soil. He

is committing a crime against old

Mother Nature, and she has no par-

ticular way of defending herself.

This last named individual usually

begins his career with hopes high,

and his profits all estimated in ad-

vance on a sheet of note paper

which he carefully keeps in his vest pocket. Some are more long-sighted are doing their best, they are not than others, and they estimate their profits for five or six years in ad-

vance, and by referring to this valuable memorandum they can tell you just what they will be worth

three or four years from the present. But somehow their bright more of the afore said, and it dreams never seem to come true and only serves them right. The really

when the soil robber sees his crown prosperous community resting on a going from forty ac acre down to nothing, and figures up what is due on his machinery, which usually

stands out in the weather from one year's end to another, he often times puts his hat on his head, which is about all his head is good for, and walks off, leaving no future address for the tax collector.

If you have ever lived in a community of soil-robbers you will know at the end of a comparatively few years they either change their

ways or move out. Even while they

the autumn days are going, and we

are at the door, and wire-edged winds

are blowing from Unalaksha's shore;

the winds so keen and chilly have

knocked the roses silly, and they have

canned the lilys, so it will bloom no

more. The flowers we love and cher-

ish through all the summer; but they

SOME FACTS ABOUT THE
NEW FORDProduction and Demand for
New Ford Exceeds All
Previous Records

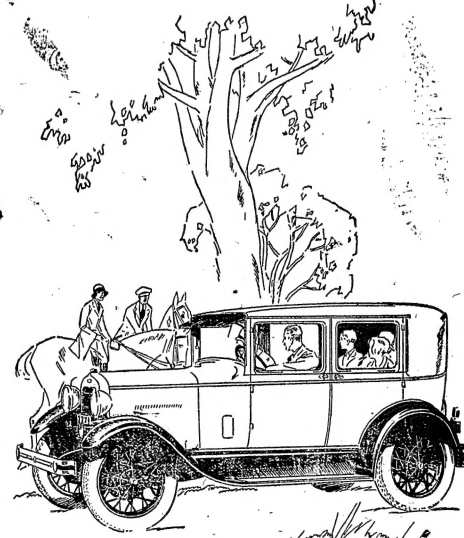

The manufacturing schedules of the Ford Motor Company of Canada, Limited, have been steadily built up until a new daily record for Canadian automobile production has been reached.

Despite this peak output, orders for the new Ford keep uniformly ahead of the rising tide of manufacture. It is therefore necessary to continue a high rate of production. To this end a steady flow of material from more than 385 Canadian sources streams into the Ford plants. And here, with more than 10,000 men on the pay-rolls (almost double the previous employment record) these materials are converted into New Ford cars.

Ford Quality of Manufacture
Has Been Strictly Maintained

In the effort to build enough New Ford cars to meet requirements, no deviation from the high standard of Ford precision has been permitted. This standard, unbelievably strict, was set before the car was placed upon the market, and it has since been rigidly adhered to.

In the New Ford car 40 different steel alloys are used. Each is chosen for the specific use for which it is best adapted. In the transmission gears alone there are seven different kinds of alloys. Likewise, the forged steel spring perches, hardly bigger round than a man's thumb, will withstand a strain of 15,000 pounds. This is 30 times greater than the strain put on them in ordinary use.

The excellence of materials used is matched by the careful precision of its manufacture. For example, the eight valve guides in every engine may deviate from perfection only by 1/30th of the thickness of the average human hair.

The simplicity and soundness of Ford design is unparalleled. Such manufacturing methods ensure a

high degree of satisfactory performance over a long period of years.

Ford Performance is the
New Standard for
Judging Automobiles

The rapidity of get-away and acceleration of the New Ford is a by-word. Its endurance, which

permits sustained driving at the higher speeds hour after hour, is little short of marvelous. The ease with which steep hills are climbed in high gear is equally as impressive. Shifting gears, steering and handling the car under the most trying road conditions are exceptionally simple. 25 to 30 miles per gallon of gasoline and remarkably low oil consumption give a worthwhile operating economy.

In city traffic and on country highways, the New Ford performs as well as and often better than considerably heavier and higher priced cars. In the light car field it is absolutely without equal.

By these marks of Ford performance other motor cars are being judged. It simply means that price is no longer the gauge of automobile quality.

Ford Beauty Is More Than
Skin Deep

On the surface the New Ford car is all that you want it to be. Beautiful lowlines, harmonious color combinations, sparkling nickel, sturdy steel spoked wheels and balloon tires all play their part in making this a car of graceful proportion and handsome appearance.

But its real beauty is invisible. The quality of materials; careful workmanship; correctness of design; the things that really matter—these are the points in which the New Ford is exceptional.

Windshield of shatterproof glass and a six brake system, fully enclosed, safeguard occupants in any emergency. Four efficient shock absorbers in conjunction with the best proven light car spring system, give matchless riding comfort. All models are completely equipped to provide the ultimate in comfort, convenience and safety.

If you have not ridden in the new Ford car, or experienced the thrill of driving it, there awaits you the knowledge that car values have actually changed; that a really fine car has come into the local car field; and that values offered by the new Ford cannot be duplicated anywhere. Your local Ford dealer will prove these statements by demonstration.

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONTARIO

And probably there would be some advantage if teachers aimed at permanent mental benefit in their pupils; but what they seek is to prepare the pupils for next term's examination. The public judges a school by examination results, and teachers act accordingly. In the one grade class, in consequence, the tendency is for the teacher to talk on times too much. The pupils are going through the process of being examined for the next examination. There is little time for silent efforts to solve a problem in arithmetic or to analyze a complex sentence without the aid of the teacher. In the rural school the pupils of some grades get time to think while the teacher is engaged with another grade.—Catholic Register.

GIVING PUPILS TIME TO THINK

A correspondent of one of the Toronto dailies takes it for granted in his letter that pupils are handicapped in rural schools as compared with those of city schools. He thinks that a teacher having charge of one grade can do better work than one who has to teach several grades.

Issued by Publicity Commissioner, Government of Alberta, Edmonton.

Government to Assist Grain Exhibitors: Alberta exhibitors at the Toronto As in previous years, the Alberta Royal Agricultural Show and an honorarium of \$150 will be paid by the Department to each Alberta winner of a grand championship and \$100 for each first prize. In addition to the Department of Agriculture will duplicate the prizes for grain won by

In rural communities in the Vegreville district. Miss Romanukovich who by training is well suited to this work, will conduct a survey of non-English speaking communities.

Many New School Districts Are Established

Forty new school districts have been established in Alberta this year, according to the Department of Education, bringing the total of rural districts up to approximately 3,000. Over 5,000 school rooms are now being operated including city, town and rural schools. School expansion has been particularly noticeable in the north-western part of the province, three new districts having been formed in the Battle River, Peace River, and Peace River North districts north of Peace River. Next year is expected to see many further additions made to the number of schools in the province.

Alberta Industries Steadily Growing
Alberta leads among the prairie provinces in the value of manufactured products for the year 1928 according to the report just issued by the Dominion Bureau of Statistics. Alberta industries in 1928 numbered 745 with 10,225 employees, a capital of \$72,488,236 and products valued at \$85,425,321. The number of established industries increased by 15 and the capital by \$8,300,000 during the year. The products of Manitoba manufacturing plants in 1928 is placed at \$57,717,923 and those of Saskatchewan at \$47,108,007.

New Agriculture Text Distributed
A new text book on agriculture is now being distributed by the school book branch of the Department of Education for use in the high schools of this province. It bears the title "Canadian Agriculture for High Schools," and is authorized as a text for the higher grades, the elementary grades already having a text on the subject. The authors are a number of the members of the faculty of agriculture at the University of Alberta, and the book is particularly concerned with and adapted to the conditions of Alberta farm life and work. Alberta is the first province in the Dominion to have an advanced text of this description.

Alberta Trade With United States

Increased
Trade with the United States for the Province of Alberta during the quarter-year ending September 30, 1928, reached \$1,800,790, an increase of \$110,290 over the corresponding period of 1927, according to the quarterly report of U.S. Consul S. C. Reat of Calgary. The total declared exports from the Calgary district for this period in 1927 were valued at \$496,745, and in the same months of 1928 goods to the declared value of \$845,674 were exported. From the Edmonton consular district the principal exports were fish, 1,685,222 pounds, value \$193,918; meat, 930,870 pounds, value \$165,530; furs, number 30104, value \$142,860; cattle, number 941 value \$50,725.

University Steers Ready for Eastern Shows

As in previous years a number of steers fitted for the show ring by the Department of Animal Husbandry at the University of Alberta, will again compete for honors at the Toronto Royal Show and the Chicago International. Nineteen choice animals in-

cluding representatives of the three principal beef breeds will be sent this year where it is hoped they will equal the high mark set by Alberta entries in former years.

Alberta Wheat Yield Average Reduced

On the basis of returns received by the Department of Agriculture from threshers in all sections of the province, it is estimated that the Alberta wheat crop for 1928 will average approximately twenty bushels per acre. Although this figure is some seven bushels lower than the phenomenal returns in 1927, it is over two bushels above the ten year average for the wheat yield for the province. Further threshing returns and reports of grain inspections indicate that the damage to the crop as a result of the frost is more serious than was anticipated when earlier estimates were made.

Magnesia Best for Your Indigestion

Most people who suffer, either occasionally or chronically from gas, sourness and indigestion, have not discontinued disagreeable diets, patent foods and the use of harmful drugs, stomach tonics, medicines and artificial digestants, and instead, following the advice so often given in these columns, take a teaspoonful or four tablets of Bisurated Magnesia in a little water after meals with the result that their stomach no longer troubles them, they are able to eat as they please and they enjoy much better health. Those who use Bisurated Magnesia never dread the approach of meal time because they know this wonderful, full anti-acid and food corrective, which can be obtained from any good drug store, will instantly neutralize the stomach acidity, sweeten the stomach, prevent food fermentation, and make digestion easy. Try this plan yourself, but be certain to get Bisurated Magnesia, especially prepared for stomach use. C-12

VEGREVILLE HOME DESTROYED BY FIRE

Vegreville, Oct. 27.—Damage to the extent of probably a thousand dollars or more resulted from fire which broke out in the residence of W. H. Miller at 5:30 Friday afternoon. The blaze was extinguished by chemicals, but not till after considerable damage had been wrought both through fire and breakage in removing contents.

Here and There

(159)
The new Canadian Pacific liner, "Duchess of York," has been launched at Clydebank, Scotland, by Her Majesty the Duchess of York. H.R.H. the Duke of York and other notables were present. The vessel is at 20,000 tons, and is the fourth and last of the "Duchess" quartette of steamships built for the service of the St. Lawrence route.

Two hundred Chinichilla rabbits accompanied by a ton of special food for their twelve thousand mile journey from England to New Zealand were recently landed by the Canadian Pacific Express Company. The little animals were bred in Lincolnshire and are to serve as a nucleus of a rabbit fur farm in Auckland. As rabbits are regarded as a pest in the Antipodes special arrangements had to be made to allow them to enter the country.

George Jihavice, son of the Finance Minister of Czechoslovakia, is the latest addition to Alberta's list of notable farmers, led by H.R.H. the Prince of Wales, whose E. P. ranch is only one royal demesne among several, including that of the Duke of Sutherland. Young Jihavice, who is only 22 years of age, has settled near Lethbridge, where he is gaining farm experience on the farm of C. B. Daniel before launching out for himself.

Thirty-five visits and departures of Canadian Pacific steamships will be made in and out of the Port of Saint John during the coming winter season, between December 1st and April 26th. It is officially announced. This represents an increase of three over the previous season. The two new "Duchess" class steamers, the "Duchess of Richmond" and the "Duchess of York," make their first appearance on the sailing list, the former being due in New Brunswick on March 23rd and the latter on March 30th.

The promotion of two of Canada's best known hotelmen to important posts in the service of the Canadian Pacific Railway has been announced by the hotel department of the company. B. A. Neale, manager of the Chateau Frontenac at Quebec, has been appointed manager of the new 1,200-room skyscraper hotel in Toronto, the Royal York, which will be opened to the public next summer. His place in the great hotelery at Quebec will be taken by John Johnston who has been assistant manager at the Chateau for some time.

The distribution of dividend money every three or six months to shareholders of industrial and commercial enterprises in Canada runs into many millions of dollars every year. The money goes to an army of people throughout the country, many of whom depend on it for their living and it has much to do with the continued prosperity of Canada. About 88 companies are listed on the Toronto Stock Exchange, a small part of the total number of those making regular dividend disbursements in Canada, but for the third quarter of this year these 88 companies distributed in dividends over twenty million dollars to the Canadian Pacific alone accounted for \$7,500,000. This was by far the largest distribution by any one company, the next largest being \$513,000. The number who regularly benefit by these distributions of profits is increasing every year, thus showing a more general tendency on the part of the Canadians to invest their earnings in the stocks of well established and sound industrial concerns.

Skeleton Hand Saves His Life

Prof. K. Zurawski, Polish scientist, who recently arrived in Canada on the Cunarder Aurania to begin touring North and South America in the interests of reduction of social diseases. He is a pioneer X-ray experimenter and shows to this day a pinkness of hands resulting from inevitable exposure to the mysterious Roentgen ray which proved fatal to all his earlier comrades. Refusing to use his hands like his confreres in proving the efficiency of the ray, he invented a boxed skeleton hand as a substitute.

Bad Legs

Do Your Feet and Ankles Swell and Infirm and Get so Sore You Can Hardly Walk

Thies; Pastoral: "Announcing to Confession." Froese; Mueller; Pastoral Sermon: Rev. A. Appelt (sub. Dir. Schwerman); Confeational Address: Rev. Trinkelmeier (sub. Rev. Salaska); Homiletical: "Where do I take my material from for sermon writing?" Rev. Ohlenger; "The

Work among the Young People," Rev. Trinkelmeier.
Other items are: Reports on College, Schools, Wither League, Publicity, Unseen Church, Finance, Immigration, Vorklagungs Thesen, Progress of Lodge question.
On Wednesday, Nov. 7th, at 7:30, there will be a regular pastoral service combined with Holy Communion.

W. C. T. U.

Miss Olton, national W.C.T.U. field worker among young people, will be in Wetaskiwin on her return trip from the Coast, on Tuesday and Wednesday, Nov. 13th and 14th. A program of her work will be announced later.

HOSPITAL AID NOTES

Preparations are going on to make the Hospital bazaar, which will be held on the 15th of November, in the U.P.A. Hall, one of the best yet. Owing to lack of space there will be no chicken dinner, but instead a booth where chickens will be sold. There will also be a delicatessen table where delicious foods ready for the table may be secured, as well as the usual booths for fancy work and plain sewing, fish-pond, and, last but not least, the House-house. Afternoon tea will be served, also a lunch counter will cater to the wants of those attending the Jitney dance later in the evening. It will be an impossibility to personally canvass everybody for any or all of these, but it is hoped the friends in city and country will respond generously to this appeal, as the Hospital Aid Society are in need of the funds to carry on their work.

A CALL TO CONSECRATION

An open letter to members of the United Church of Canada, from Dr. Gunn, Moderator of General Council, Winnipeg, September 15, 1928.
To the Members of the United Church of Canada, greeting:
The first General Council of the United Church had for its keynote, "Unity." The second Council was necessarily concerned with "Organization." The third General Council, just held in the city of Winnipeg, while dealing also with the completion of organization, was led by the Spirit of God to turn with happiness to the deep thing, of the Kingdom and it is sending out to the Church a call for "Consecration" and spiritual advance.

Our Boards of Evangelism and Social Service and Religious Education brought before the Council a resolution to issue a call to all members and ministers of the Church to give themselves more than ever to communion with God, to prayer and the reading of the Word, to more heroic practice of the Gospel in everyday life and the endeavor to win to allegiance to Jesus Christ those who have not yet accepted Him as their Lord and Savior.

Your Moderator, since his election to that office, has had upon his heart the words of our Lord in His great prayer for His disciples, "For their sakes I sanctify Myself." Why our Master felt this, or how it could be possible for Him, I do not know, but I felt my own great need to wholly consecrate myself that I might give of my very best for the Kingdom of God and our great Church.

This same desire was evidently in the minds of the members of the General Council. It was felt that we could not call upon others to do what we would not do ourselves, and that this call to consecration came home to us first of all. With deep and earnest feeling and with solemn prayer, the Council, by standing vote, both consecrated themselves and endorsed this call to all members of the Church for greater consecration, more heroic lives, for spiritual advance and greater effort to win others to Jesus.

We cannot organize a revival, but by the Grace of God, we can begin one. Wherever one earnest heart turns to God for purity of life and power, there is a flame kindled and a revival is begun.

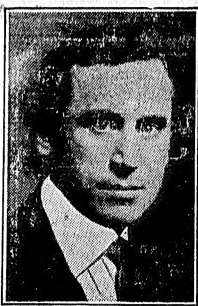

Without waiting for organizations or meetings, will each one of the members of our Church, and especially the young people, join with the members of their General Council and their Moderator in new consecration of our lives to the service of our Savior? Let us go forward with Christ.

WILLIAM T. GUNN, Moderator of the General Council of the United Church of Canada.

PASSENGERS ON C.N.R. TRAIN
ROBBED NEAR CALGARY

Calgary, Oct. 27.—Armed with a stolen .22 calibre rifle, a masked bandit held up the passengers in the motor car of a Canadian National railway Edmonton-Calgary train, four miles west of Lysalta, at 7:20 o'clock Friday night and got away with \$38. The bandit had gone through the pockets of only two passengers when the alarm was raised and the train stopped. As the train came to a halt he jumped off and disappeared. A good description of the robber was obtained and Canadian National, provincial and city police are making every effort to capture him.

Albertans should feel proud of the showing made by the athletes from the University of Alberta in the intercollegiate meet held in Winnipeg recently, when they won premier honors, taking 75 points to Manitoba's 49 and Saskatchewan's 20. H. Wright, Alberta, was the star, winning 4 firsts for 20 points in the 100, 220, 440 yard runs and also the broad jump.

JOHN JOHNSON

John Johnson, whose appointment to the position of manager of the Chateau Frontenac, Quebec, is announced to be effective November 1st. Mr. Johnson joined the staff of the Chateau Frontenac as clerk in 1920, and became assistant manager in 1924. He succeeds B. A. Neale, who is appointed to the Royal York Hotel, Toronto.

PIONEER DOCTOR OF EDMONTON, DR. SMITH DIES IN HOSPITAL

Edmonton, Oct. 26.—Pioneer doctor, ex-alderman and a popular citizen, Dr. H. R. Smith, aged 55, who for the past seven years was medical superintendent of the Royal Alexandra Hospital and Isolation Hospital, died suddenly Wednesday. His passing came as a shock to medical and hospital circles as well as to others in all parts of the province, while friends in this city, where he had lived for 25 years, were stunned by the news.

43,000,000 VOTERS QUALIFY TO JOIN BATTLE OF BALLOTS

Washington, Oct. 29.—Forty-three million men and women, by far the largest number ever registered, have qualified to participate in the battle of ballots at the presidential election on Nov. 6.

This total marks an increase of nearly 14,000,000 over the vote cast in 1924, and makes the figures of former years appear small in comparison.

THE NIGHT OF THE BATH

If there is any truth in the old saying "that cleanliness is next to godliness," then we must be godly people, for we have an inherited and indoctrinated belief in the free and untrammeled use of hot and cold water (with a little soap). Many of us even brag about taking a cold bath every day. I think the bathtub could well be incorporated into our coat-of-arms, for its use has been woven into the very fabric of our civilization. This popular indoor aquatic sport now shares a common glory, with sleeping porches, shoe-shine parlors, chewing gum, hot-dogs, exposed legs, bootleggers and other evidences of modern refinement and culture.

Some of this instinct for water came from early home training.

Back in my boyhood days (and that's a good many years ago) Saturday night was almost religiously regarded as the "clean-up" night of the week. It was the time when anxious parents rounded up their recalcitrant offspring preparatory to the weekly purification. There was no evading this ablutionary ceremony. No alibis were accepted—not even in summer when we maniacally manifested the number of times we had been in the old swimming hole. No matter how strenuously we protested that we were clean and spotless, once Saturday night came around we would be soundly soaked, soaped, scrubbed and scoured in conformance to established custom. A stern parental code decreed that we should be well and truly purified before donning the Sabbath raiment which was the hall-mark of family respectability. Regular attendance at Church and Sunday School was an imperative decree, and we appeared there clean, sanitary and antiseptic, as befitting the offspring of staid and respectable burghers.

Very few homes in our town at that period had separate bath rooms. Porcelain tubs, shower baths, tiled walls and floors were an unknown luxury. There was no town water supply. The only running water in the bedrooms came through a leaky roof during a rain storm. The standard and popular type of "bath" was a wash-tub in the kitchen or woodshed—the balance of the plumbing being located elsewhere.

Sometimes during the afternoon of the fatal day a couple of big iron pots would be filled with rain water from an outside cistern—or melted snow in the winter time—and placed on an old-fashioned wood stove to heat.

With a limited supply of water and an unlimited supply of children (for it was the age of old-fashioned families) it was necessary to be economical. The water was therefore heated as hot as possible so that at least two or three of the smallest youngsters could be soaked in the same water before it became too cold.

This Saturday night ritual was a regular institution, established

through count, necessity, and a certain amount of precaution (not that there was any fear of a visit from the Sanitary Inspector, but it was food, animal, fish or vegetable, the wise to be prepared). Under the detergent influence of soft soap and water accumulated layers of real estate were gradually dissolved, and children's features again became recognizable and familiar to their parents.

While this aqueous ceremonial was more or less publicly perpetrated on the youngsters, our elders more modestly practised it in the sanctuary of their bedrooms. Whether the victim was of gaudy proportions or endowed with a plenitude of blubber, it required considerable gymnastic ability and a lot of enthusiasm to stand in a few inches of water in a cold bedroom and make a satisfactory job of the operation.

"GOD PROVIDES THE MEAL," BUT—

There are a lot of people who, either from laziness or stupidity, take literally the words, "The Lord will provide," says the Grand Forks Gazette.

"It is very true," the Gazette continues, "that the Lord provides. He is the Universal Provider. But He provides according to laws which operate to carry out His will and with which we must co-operate. There is an old saying that bears on the matter: 'God provides the meal but does not cook the dinner.' It holds true.

"Look around you and you will see that there is an abundance of everything provided in nature for man's use and sustenance and to fit him to carry forward the great scheme of human progression. Of food, multitudinous varieties and quantities; far more than the peoples of the earth can possibly use for their food re-

quirements (what a tragedy under these circumstances that so many go hungry!) No matter what kind of food, animal, fish or vegetable, the most abundant supply is there. "But fish must be caught, animals killed, crops grown and harvested," God provides the meal but—
"It is the same with regard to all other material that man requires with which to fashion life. Minerals, timber, power, light, heat, everything in abundance all waiting to have human energy and skill applied to them to place them fully and unreservedly at the service of mankind. What a magnificent world and what bountiful provision. Bread will not fall into our mouths by our merely opening them. Fields must be cultivated. Follies, all that is necessary and a surplus for good measure.
"This little sermonette is intended, maybe, as a little rebuke to laziness. God helps those who help themselves. Those who will not help themselves don't deserve to get helped. They soon find their own level. But if one will simply realize the full

and complete supply of all our needs is ours for the asking of God and the co-operating with Him in His great

live work, then everything will come our way. 'God provides the meal but He does not cook the dinner.'

"SALADA" TEA

The Finest of All Fine Teas

HAS PLAN TO AID PRODUCTIVITY OF WESTERN SOIL

Toronto.—The rehabilitation of the soil of the western provinces through the use of nitrate fertilizer developed by electricity, possibly in Manitoba, is envisaged by Prof. J. Watson Bain, head of the Chemical Engineering branch of the faculty of applied science, University of Toronto.

Addressing the Toronto Electric Club, Prof. Bain said that by passing the component parts of water and air through a simple chemical process, ammonium nitrate, the best and most concentrated fertilizer known, could be produced in unlimited quantities. By the fusion of rock phosphate and coke a compound of phosphorous used in the fertilizing process would result.

"I believe," he said, "that before many years pass we will have to supply fertilizer to the west. They have been 'mining' the ground there in

the production of wheat. In Germany, to show how important fertilizers are to Canada, it is not uncommon to produce forty bushels of wheat to the acre. In Ontario the average production is twelve bushels."

Before many years, Prof. Bain believed, a great plant would be installed in some of the northern rivers running into Hudson Bay, where electric power could be developed. Water would be taken from the river to obtain its hydrogen content and nitrogen would be removed from the air. The two could be united to form the great basic element of plant food, the ammonia. The phosphate rock could be found in the same area and that coke could be freighted in to complete the manufacture of phosphorous in the huge electric furnaces which would derive their heating power from the harnessed waters of the river. In both processes, Prof. Bain be-

lieved, electricity would be used in the heat necessary in breaking up the elements of the mediums used. "It will be a contribution of electric engineering," he said, "it is a field in which we can join hands to produce for the benefit of the country at large."

THE LONGEST WORD; TAFFY TRIMS MIKE IN WORDY BATTLE

An interesting scene was witnessed down on Main street the other day when the Welsh and Ukrainians staged a battle, the former being represented by Joseph Price and the latter by Michael Dutka. While no blood was shed, the feelings of the bystanders were considerably incensed by the strange, mouth, blood-curdling explosives hurled by the combatants at each other. Joe spluttered out a yard or two of his native Cymric while Mike retorted with an earful of the language which made Shevchenko famous.

Trouble started when Mike avowed that the Ukrainian language, in a pinch could produce a longer word than the Welsh. After singing a verse or two in Welsh of the "Men of Harlech," Joe produced his word which was translated as follows:

"Llanfairpwllgwyngyllgogerychwytant-tysylltut."

Mike looked at Joe in horror, realizing that he was trimmed, but he had no slouch of a word at that, his confounding being a name:

"Marushechkiwchukowskaja."

So while Mike was badly beaten he was not disgraced.—Vegreville Observer.

ALBERTA PACIFIC GRAIN PREPARES FOR EXTENSIONS

With the wheat belt moving farther north each year, the Alberta-Pacific Grain Company is placing property at favorable locations in an endeavor to meet the requirements of the new development, James Stewart, president, told shareholders of the company at their annual meeting Thursday morning.

Prospects for the coming year were favorable Mr. Stewart continued, and crops had exceeded half a billion this year Western Canada's wheat bushels.

Grain elevators, he said, before the end of next summer, would have been called up to forward to the import markets of the world about one and a half million bushels of wheat daily.

ALBERTA SENT \$2,000 TONS TO ONTARIO MART

Drumheller, Oct. 22.—Some \$2,000 tons of coal were shipped to Ontario during the shipping period of April 15 to July 15 of this year, according to figures received by President Walker of the Drumheller Board of Trade. This is no great tonnage, when viewed in the light of Alberta's domestic coal output, but on the basis of \$4 a ton at the mine, it means some \$200,000 of Ontario money was spread about in Alberta in the way of wages, materials

Found Them Wonderful for Constipation

Mrs. John D. Behrens, Onion Lake, Sask., writes:—"I have been troubled with constipation ever since I can remember, and have tried different kinds of medicine, but with very little effect. Reading in your Almanac I saw where

Milburn's LAXATIVE PILLS

had relieved others from constipation so I decided to give them a trial. "I got a few pills and they did me a world of good; I have been constipated ever since I began taking them, and I can now say I feel fine again."

and other expenditures. This sum is small compared to what it would be if shipments could commence on January 15 of each year and run for six months. The movement, however, has been big enough to prove its possibilities, and to make those interested in hope that the Ontario coal market will be permanently supplied from this Province.

HELPING HARVESTERS TO GET WINTER WORK

With the object of encouraging the satisfactory completion of the numerous British harvesters who will remain in Western Canada when the present threshing season is over, every effort is being made by Colonization and Land Settlement Offices and the Provincial Labor Bureau to have these men placed as farm help throughout the province for the coming winter.

Of the numbers who came from the Old Land to assist in the harvest, some have returned to their homes — in many cases this course was dictated by their domestic circumstances. There is no doubt, however, that many of these men will return to Canada with their wives and families as soon as conditions will permit them to do so. In addition, it is only to be expected that a certain number of these harvesters who have not fitted into conditions which prevail in this country, will return to England.

There is, however, a great body of harvesters who are willing and anxious to remain in Western Canada, providing they can secure winter employment. If these men can tide

B. A. NEALE
B. A. Neale, popular manager of the Chateau Frontenac, whose appointment as manager of the new Royal York Hotel in Toronto is announced to be effective November 1st. The managing of the Royal York is considered the most ambitious hotel position on the continent. Mr. Neale has steadily risen in Canadian Pacific service since 1911, when he transferred to the hotel department from the General Superintendent's office in Montreal.

themselves over the winter and during that period familiarize themselves further with farm work, they should be able to earn satisfactory wages in the spring and have no difficulty in securing farm work on a yearly basis at wages which will leave them in very much better circumstances than those under which they were working in England.

The Dominion Government through the Land Settlement Branch, both railway companies through their colonization branches and station agents, and the Provincial Government through the employment offices, have undertaken to make every possible effort to assist these men in finding winter employment.

The main difficulty is to get in touch with the men who are prepared to remain in this country and to put them in touch with winter jobs before they lessen their chances of securing these jobs by leaving the districts in which they are at present working and congregating in the larger centres. They stand a better chance of securing work if they retain their present employment as long as it is available for them.

Filling this, they can receive the assistance of the officials of the Land Settlement Branch who are located at central points throughout the province to whom almost any farmer can direct them, or from their local station agent or the local employment office which organization has 200 voluntary agents throughout the province.

VOTE ON WIDE SLEIGHS BEING TAKEN AT PONOKA

A "straw vote" for wide sleighs is being taken with a view to improving winter road conditions by general use of wide bench sleighs, and thus saving the Provincial Government and municipalities the expense of keeping the roads open during the winter month. A large number of local farmers are signing the petitions, which are being placed in our local stores.—Ponoka Herald.

JOINT-EASE For Stiff, Swollen Joints Rheumatic or Otherwise

Says: "When Joint-Ease Gets In—Joint Agony Gets Out."

It was a high-class pharmacist who saw prescription after prescription fall to help hundreds of his customers to get rid of rheumatic swellings and stiff, inflamed joints. And it was this same man who asserted that a remedy could and would be compounded that would make cranks, croaks, and torn joints work with just as much smoothness as they ever did.

Now this prescription, rightly named Joint-Ease, after being tested successfully on many obstinate cases, is offered through progressive pharmacists to the millions of people who suffer from ailing joints that need limbering up.

Swollen, twingy, inflamed, stiff, pain-tormented joints are usually caused by rheumatism, but whatever the cause Joint-Ease soaks right in, through skin and flesh and gets right to and corrects the trouble at its source.

Remember Joint-Ease is for ailments of the joints, whether in ankle, knee, hip, shoulder, spine or finger, and when you rub it on, you may expect speedy and gratifying results. It is now on sale at druggists everywhere for 50 cents a tube.

FINED FOR USING CANCELLED STAMPS

On July 26, F. Tornowski, Trochu, posted a letter at that office bearing three previously used two-cent stamps, one of which bore evidence of an attempt to remove the official cancellation mark. He was arrested and charged with using previously used stamps with fraudulent intent and also with removing cancellation marks. On the former charge he was found guilty and fined \$10 and costs. On the second charge he was committed for trial.

at the next district court at Calgary and allowed out on bail of \$1000 pending his trial.

In the district court at Calgary on October 10, Judge MacDonald found Tornowski guilty of removing using postage stamps from mail matter with intent to defraud; also found him guilty of attempting to remove cancellation marks with intent to defraud. Sentence of \$10 and costs on each charge or thirty days in jail was imposed on Tornowski, and in sentencing him the Judge explained that while here was no doubt of the man's guilt, he was dealing leniently with him because he had only been in the country a little more than one year. Tornowski paid the three fines totalling \$30, and costs, and was seriously warned.

Straying away from home, while the parents were absent, and crawling on to the C.N.R. tracks near Broneta, the 1½-year-old son of William Tesko was killed by an Edmonton-bound train. The little body was taken by the crew to the nearest house, which happened to be the victim's grandparents.

Two papers in one—The Family Herald and Weekly Star, Montreal—one for the farm, the other for the home, both of superior excellence. One dollar a year covers the subscription, or three years for \$2.

VISCOUNT ALLENBY

Lord Allenby is, perhaps, the most ideal of the figures produced by the Great War—a chivalrous knight of romance without fear, without reproach, without the shadow of failure, who won from the Turk those hills of Palestine on which, or on the way to which, wave after wave of Christian valor and devotion broke and perished in the empty quest of rescuing the "Holy" land from the muddy "Ottoman." Richard of the Lion Heart who could personally howl his way with his heavy axe through the ranks of the Saracen spearmen, never reached Jerusalem, Allenby, in less than six weeks from his entrance at Beer-sheva, entered that cynosure of many faiths, that broken tombstone of localized religion, reverently on foot without a blow, with the concurrence of the Arabs, (Allah-nebi, prophet of Allah) and to the joy of the inhabitant of the blasting Turk. Lord Allenby's later campaign, with depleted forces, through Syria as far as Damascus, Beirut and Aleppo, all now occupied by the French, was, for the assured result of every calculation, one of the most brilliant on record. In view of the key position of that campaign at Megiddo (Armageddon) he wears that name of portend in his title. He is Viscount Allenby of Megiddo and Feltzwater. Titles would not be bad things if they could be reserved for those to whom such distinction properly belongs.—Montreal Witness.

Makes Life Sweeter

Children's stomachs sour, and need an anti-acid. Keep their systems sweet with Phillips' Milk of Magnesia!
When tongue or breath tells of acid condition, correct it with a spoonful of Phillips. Most men and women have been comforted by this universal sweetener—more mothers should invoke its aid for their children. It is a pleasant thing to take, yet neutralizes more acid than the harsh things so often employed for the purpose. No household should be without it.
Phillips is the genuine, prescriptive product physicians endorse for (and use); the name is important. "Milk of Magnesia" has been the U.S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1876.

PHILLIPS Milk of Magnesia

PICKLE TIME

When Grandma does her pickles, (All) Thoreau
From doors and windows start
The finest odors of the year
Make me feel
So happy and so happy,
And glad that Autumn's here,
When Grandma does her pickles
It's lively and it's queer.
When Grandma does her pickles,
I think of stonies grand,
With spicy beads around me,
It's like some Eastern land,
With palaces and elephants
In countries far away,
When Grandma does her pickles
All on a golden day.

Part of Whitley Abbey in England, one of the abbeys founded by the Cistercian monks, whose last abbot was hanged in 1537, is being restored by the Roman Catholic Church for use as a church. This applies to a very small part of the abbey, however, and the rest of it is being acquired by the government to be used as a retreat for the new diocese of Blackburn in Lancashire.

The Temple of Heaven, whose three-tiered dome of blue has been long one of the glories of old Peking, has now been converted into a military storehouse. The plan is military necessity. For a while even the temple itself was filled with explosive, but now these are stored in the Hall of Abstinence.

WRIGLEY'S
The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure.
It cleanses the mouth after eating—gives a clean taste and sweet breath.
It is refreshing and digestion aiding.

MILLET LOCAL NEWS

Mr. Someshur of Ponoka, formerly of Millet, visited town on Thursday.

Mr. Ted Matheson left on the midnight train Monday, for his home in Winnipeg.

Contributions for the Wetaskiwin hospital bazaar will be gladly received by Mrs. Piquet.

Health Inspector Williams of Edmonton was in town for a short time on Saturday afternoon.

The W.A. is holding a bazaar, with side attractions and afternoon tea, in the Community Hall on Nov. 17th.

Mr. and Mrs. C. Moon motored to Provost on Friday to spend a few weeks with Mr. and Mrs. Landmark.

Mr. and Mrs. Home, with their family, of Redlands, Alberta, are guests at the home of Mr. and Mrs. J. O. Anderson during this week.

A number of residents were fortunate in seeing the magnificent rainbow which arched the north-western sky about 7:30 a.m. on Thursday last.

Bills are out announcing the Auction Sale, Nov. 13, of farm equipment of Mr. Gilling, south of Millet. Sale to be conducted by A. P. Mitchell, Auctioneer.

Mr. Martin Strand, who was severely injured two weeks ago by a wagon wheel passing over his back, was taken to the Wetaskiwin hospital on Saturday for X-ray examination. It is expected that he will be confined to bed for several weeks longer.

Rev. Mr. Hughes of Clive, former pastor of Millet United church, will occupy the pulpit here next Sunday evening and at Hillsdale for the afternoon service. Rev. L. R. Macdonald went to Clive for the Sunday services when he was pastor several years ago.

ITEMS OF INTEREST

In the province of Vestergetoland, Sweden, a church bell seven years old is still in use. The date on it is 1225 A.D.

Beer was brewed in Babylon thousands of years ago, and it did its work then just as it does now, and the people were set the better for it.

The Coliseum at the Canadian National Exhibition, Toronto, a civic enterprise, is the world's largest exposition building, covering 16 1/2 acres. This exhibition is the largest in the world held annually.

The Government of Germany has cabled its thanks to the Canadian Government for aid to the crew of the Bremen, both by government officials and private individuals.

British Columbian eggs have invaded the New Zealand market and not long ago 10,500 dozen reached that country in good condition, and caused a drop of from two to four cents a dozen in the price.

The Reform Act of 1832 in Britain made 217,000 new voters; that of 1867 made 938,000; that of 1884 made 1,762,000; that of 1918 made 13,000,000; and that of 1928 makes 9,250,000.

On about two ounces of fat the golden plover travels 2,400 miles in forty-eight hours without stopping. This is surely a marvel of efficiency and economical operation.

Men are very near the kingdom of God when they do not get anything good in themselves.—Moody.

Nervous Breakdown

HEART PAINED HER COULD NOT SLEEP

Many a woman who should be strong and healthy, full of life and energy is hampered by the shackles of ill-health. Some disease or constitutional disturbance has left its mark in the form of a weak heart, shattered nerves, impoverished blood and an exhausted condition of the whole system. Those troubled in this way will find in

a remedy that will supply food for the exhausted nerves, that will strengthen the weak heart and invigorate the whole system.
Miss Florence Clark, 284 Smith St., Halifax, N.S., writes: "I am a telephone operator, and some months ago had a very bad nervous breakdown. My heart pained me a great deal, and my nerves were so bad I could not sleep at night. I tried many medicines, but did not get much relief until I started to take Milburn's Heart and Nerve Pills. I only used one box, and I just have to write and tell you how thankful I am for your wonderful remedy. I am now able to sleep soundly, and haven't any horrible pains."
Price 50c. a box at all druggists and dealers or mailed direct on receipt of price by The Milburn Co., Ltd., Toronto, Ont.

THINK IT OVER!

We ought to make our heroes out of the legislators who cannot be bribed, public men who cannot be bought, and the private citizen who lives for his country instead of dying for it.
—Annals Fellowes Johnson.

WEST LIBERTY

Wm. Irvine, M.P., will hold a meeting in West Liberty school on Monday evening, Nov. 5th, at 8:30. Everybody invited. This meeting will be worth attending to anyone who is interested in Canada.

MILLET LOCAL NEWS

Mr. and Mrs. H. Moffett were visitors to the city on Wednesday.

The Misses A. Smith and B. M. Truscott motored to Wetaskiwin on Tuesday evening last.

The Misses Irene Anderson and Blanche Van Valkenburg spent the weekend at their homes.

Mr. and Mrs. West, Mr. and Mrs. Moon and Little Joyce, were visitors in New Norway on Sunday.

Miss Margaret Macdonald, who is teaching in the Lacombe district, spent the week-end at the Parsonsage.

The brick work on the Wallington block is being rushed forward by Mr. Gee, of Edmonton, who has been given the contract.

The ladies of the Women's Institute will serve a chicken dinner in the Community hall on Saturday, Nov. 3rd, from 12 to 2 o'clock noon.

Hon. Charles Stewart, Minister of the Interior, and his secretary, Mr. Pratt, paid a short visit to Mr. A. P. Mitchell on Wednesday of last week.

Mr. and Mrs. Harry Phillips and Miss Doris and Mr. and Mrs. Martin Nelson motored to Fisher's Home on Sunday, and were guests of Mr. and Mrs. Archie Gilbert and Mr. Nelson.

The regular weekly meeting of the W.A. was held at the home of Mrs. English on Thursday, with ten members and one visitor present. Most of the time was spent in sewing. Next week, a business meeting will be held Thursday afternoon at the home of Mrs. Plant.

Mr. Graham and Mr. Hillman, who organized a boys' ukulele club, were at home to the boys and their parents on Thursday evening, when the club gave a demonstration of their progress, and enjoyed a social hour afterwards. The boys present were: Adrian Kent, John Duchuk, Douglas Thorpe, Kwong Yee, Dick Pritchard, Jimmy Gray, Howard Higginson, Oliver Anderson and Lorne Carney. The guests present were: Mr. and Mrs. Hillman and tiny Esther, Mrs. Carney, Mrs. Garbutt, Mr. and Mrs. Yellow, Mrs. Thorne, Mr. Horne and Mrs. Kent.

The Family Herald and Weekly Star with its wonderful improvements is now regarded as the great Agricultural Paper of Canada and the Family Circle's best magazine.

SAWS CKULL UP IN 30 SECONDS

London, Oct. 15.—A new machine, which it is claimed will revolutionize skull surgery, has been placed on display at the Medical Exhibition.

The machine can remove a circle of the human skull about an inch in diameter in approximately 30 seconds. It can be used to "repair" fractured skulls and Ernest Williams, the inventor, hopes he will later perfect the machine to "mend" broken knee caps.

To surgeons it is known as a "trepanning" dissector and it is run by an electric motor installed in the handle. The motor propels a tiny, many-sided saw at the rate of 2,000 revolutions per minute.

"The machine eliminates the danger of abscesses caused by closing of blood pores," said Williams. "The blood pores are left entirely free and after an operation another circle of skull, previously obtained, may be fitted into the bevelled socket and joined by a dissolvent gel."

It is expected that the machine will eliminate the use of silver plates to replace removed pieces of skull and will relieve suffering from expansion and contraction of the metal. The inventor is not a surgeon but was assisted by many British and foreign surgeons in his work.

CURIOUS CASE OF ALBERTA
The theory that control of the sale of liquor puts a rigid limitation upon the amount consumed encounters a severe shock from the report of the Alberta Liquor Control board, which declares that in the first year of its operation 60,000 liquor permits were issued and two years later 144,000. It would seem that alcohol breeds appetite for alcohol under government control quite as much as under the rule of the private saloon keeper. The Alberta board also declares that its "greatest problem is moonshine in the country districts." That sounds familiar. We have been told that moonshine was the peculiar product of nation-wide prohibition. — Christian Science Monitor.

Germany is planning for air-trials. Not long ago an aeroplane of 150 horsepower drew behind it a glider, and made a journey of 150 miles in safety. This is looked upon as the beginning of a new era in the carriage of air-freight.

Twelve oil wells in the Turner valley field, Alberta, are producing an annual revenue of \$3,136,000. Thirty-four new wells are being drilled.

HILLSIDE

Rev. Mr. Hughes, a former pastor of Millet, will take the church service in the school house on Sunday afternoon.

Mr. Lylo Marr of Penhold is visiting with his uncle and aunt, Mr. and Mrs. L. E. Marr.

Miss Jean Foster of the Sparling S.D. spent the week-end in the district.

All roads lead to the Hillside school on Friday night, when old and young will "trip the light fantastic" to Jervis's orchestra.

James Hoskins and Kenneth Swartz of Wetaskiwin, were Sunday visitors at their homes.

Leslie Marr completed a thirty-six day threshing run on Saturday. This was accomplished without any weather delay or breakdowns.

FUNNY ONES

"What is a whiffetree?" asks the Sioux Falls Argus-Leader. "What is a thill?" These once familiar words have a strange sound in this modernized age. For the younger generation it may be necessary to explain that whiffetrees and thills are essential parts of a buggy. Oh, yes, to be sure. And what is a buggy?—Detroit News.

"I sure is hot in this baseball park, Grandma."

"I should say so, Jimmy. See if you can find a couple of those baseball fans."—Christian Science Monitor.

"What's that?"
"Fertilizer."
"For the land's sake?"
"You're right!"
—Christian Science Monitor.

MOTORISTS BEING SUED

In the Edmonton police court on Wednesday, Magistrate Primrose found Dan Knull guilty of wanton driving and imposed a fine of \$100 besides letting him off on suspended sentence. This was the aftermath of the mix-up of cars south of Millet on October 7th which resulted in an Edmonton Chinaman losing an eye.

Mah B. Kim and Mah Yuen, the two Edmonton Chinamen who were in the car at the time, have filed a claim in the supreme court for damages of over \$18,000.

Alleging negligent driving, John H. Wear, Mrs. J. H. Wear, and Charles Heister, all of Edmonton, filed claims totaling \$2,750 against J. Yarker, of Leduc, in the supreme court on Tuesday. The accident in which the plaintiffs were injured, occurred on August 22th on the Edmonton-Calgary trail about five miles north of Leduc.

GRAHAM'S PHARMACY
MILLET

THE LAUGH WAS ON THE NEW YORKERS

The New Yorkers visiting London were gazing with outspoken criticism on the plain, unpretentious exterior of the Prime Minister's official residence in Downing street.

"What a home for a Prime Minister!" one of them exclaimed.

"Yes," said the other, who had caught sight of a small two-seater at the curb, "and look at that car, will you? Why, in 191 New York a second-hand store clerk would be ashamed to own a flivver like that."

At this moment a well-dressed man emerged from the official residence, entered the car and drove off.

"Say, who was that guy?" the last speaker asked a passing policeman.

"Mr. A. B. Oughton, the American hat-habasher, sir," answered the bebbly, polticky.

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every drug has it, but don't fail to ask the druggist for Bayer. And don't take any but the box that says Bayer, with tablets that are stamped with the "Bayer Cross."

Aspirin trade mark registered in Canada.

A Good Banking Connection

MARKETS fluctuate and conditions change, but the hazards of farming are less when the farmer is also a business man.

However, as the farmer has not every opportunity of keeping in touch with the Business World, a good Banking connection is especially necessary to him—the Bank Manager provides a ready contact with business affairs.

Our country Managers command the knowledge and experience of the whole Bank, and every local Manager is devoted to furthering the interests of the community in which he resides.

Any Branch of the Bank will give you painstaking advice and dependable service.

"DAWN"

The heroic and tragic story of Nurse Edith Cavell. The film which tells her story, simply and impressively, is as free from bitterness as she, at the hour of her death, said she wished to be. It is a picture which everyone should see.

"Mary's Castle
in the Air"Angus Theatre
Auspices of the Order Royal Purple Wednesday, Nov. 7th

SYNOPSIS

ACT I.

Living Room of the Eastbrook Cottage in June
Mr. Eastbrook, a financial man, robbed his partner, gets into difficulties and loses all his money. In his desperation he commits suicide.

When his wife, who is a very proud woman, hears it she faints and remains unconscious for twenty-four hours, and when she comes to herself she is blind. Mary, her daughter, consequently rents a cottage in the country and gets a number of people into the cottage for the purpose of making her mother believe that these are servants who are attending to her, and that the place is a beautiful summer home. In the meantime one Carlyle, the father's partner, arrives and tries to induce Mary to marry him.

ACT II.

The Same, one month later
Mrs. Eastbrook's faithful old nurse, Della, arrives on the scene determined to look after her mistress. In the meantime quite a number of complications arise.

ACT III.

The Same, 5 Minutes Later
Mrs. Eastbrook is worried over Mary's decision, and enlists Daddy Alden's aid to build a firm foundation for "Mary's Castle in the Air."

CHARACTERS

(In Order of First Appearance)

Mrs. Jenkins (a neighbor of the Eastbrooks) ELENORE ROSENROLL
Jane Jenkins (her flirtatious daughter) RUBY BYE
Bill Bronson (Jane's chauffeur) ERNEST BARNETT

GWYNNE

Mr. Simons and Miss Gillespie of Daysland, and Miss Cameron of Lacombe, and Mr. Dixon of Camrose, were Sunday visitors at the home of Mr. and Mrs. W. J. Gillespie.

Mrs. I. Johnson and Mrs. W. J. Gillespie entertained at a shower on Monday evening, Oct. 22, in honor of Miss Alice Shantz, bride of the week. The evening was enjoyable spent and the bride received many useful gifts. A dainty lunch was served at the close.

We are glad to hear Mr. P. Walstra is out of the hospital and is improving.

Mr. S. Carlson, who has been very sick, is still in the hospital.

A large number of members and several visitors attended the Sunshine meeting at Alex Edlund's last week.

NEWS FROM BRETON

Rev. F. G. Matthews, minister of the United church, has accepted a call to Toronto, greatly to the regret of many church people of Alberta. Mr. Matthews has for many years done a great work in this extensive pioneering area. His work was among the scattered homesteaders, lumber camps and school districts.

Last summer, assisted for a while by two students, he conducted services week after week, each night, in many schools.

Rev. A. L. Elliott, representing the Presbytery of Lacombe, is out at Breton this week meeting the congregation and trying to make arrangements to extend a call to another minister to continue the work of the church.

British Columbia has the latest wrinkle in marketing potatoes. One of the potato houses there is selling peeled potatoes to the restaurants and hotels. The peeled articles are delivered in milk cans, and are kept covered with cold water until used. The peelings are manufactured into potato flour and starch.

Life is brief. Make the most of your opportunities for honest work and pure pleasure.—Van Dyke.

DEPARTMENT STORE

WETASKIWIN

The British Empire's most northerly town is Dawson, in Yukon; its most southern town is Stanley, Falkland Islands, near Cape Horn.

Use The Times Want Ad. columns.

A Blue-White
Diamond

Positively the
BEST GIFT
of all

Size alone does not determine the value of a diamond. Color and brilliancy are the most important factors in this matter.

Our selection of diamonds mounted in the latest styles of settings, are all chosen with one object in view
